# A Silent Kitchen

## The kitchen that sounds like a library.

Maintaining a peaceful home environment is a top priority for AEG-Electrolux. We believe a kitchen should not only be easy on the eye, it should also be easy on the ear.

We designed our range of built-in appliances to be seamlessly integrated and perform so quietly you could almost hear a soufflé drop. Gas Hobs come with unique 'silent flame' technology, Cooker Hoods clear your kitchen of cooking vapours without making a noise about it and our dishwasher range is the quietest in the world starting at an incredible 41dB.

# The Compact Range

## Concentrated Performance.

Make the most of precious kitchen space with AEG-Electrolux's small but beautiful range of Compact appliances, perfect for kitchens where space is at a premium.

**Create a superb cooking centre for larger kitchens.**

**Combine a compact oven with a standard single oven for a bespoke double oven**

**Choose a vertical or horizontal row of products**

Living space is a luxury in many modern households and should therefore be used with care. The new compact range, with its high quality stainless steel fronts, will enhance any high-end kitchen design. Small enough to fit into a 38cm niche, the compact range of ovens and coffee machines is big on performance, offering the same high-performance features as their full-size equivalents. Our compact range also includes a dishwasher which fits into a 45cm niche.

## ADVANCED

ENGINEERING FROM GERMANY

AEG stands for Advanced Engineering from Germany. Precision German engineering means unrivalled features, function and performance. All our appliances offer outstanding performance,

versatility and reliability along with superb aesthetics to enhance your kitchen design. AEG-Electrolux products are developed and manufactured with meticulous attention to detail, using the best of modern design and the very latest technology.

## FRONTLINE

FUTURE

The Frontline Future range with Alutec® is a flexible modular cooking system which allows you to customise your kitchen to your individual needs. Mix and match your choice of gas, ceramic or induction hobs, then complete your kitchen with a grill or a worktop down-draught extractor or a stylish cooker hood.

## SAFETY

IN MIND

Your safety and health is of paramount importance to us. That's why AEG-Electrolux appliances are always designed with safety in mind. Many of our ovens and hobs come with a child safety lock and an auto-safety switch off, whilst the safety thermocouples on gas hobs ensure that if the flame goes out, the gas stops flowing immediately. Our engineers work hard to include features that avoid accidents, ensuring that your kitchen is a relaxing place to be in.

## THE ALUTEC®

RANGE

This unique finish from AEG-Electrolux takes the style and elegance of stainless steel one stage further. AluTec® is a distinctive pearl blasted aluminium finish, which perfectly complements all types of kitchen furniture.

AluTec® is exceptionally easy to keep clean. Even abrasive cleaning detergents can safely be used without leaving marks on the surface and it is fingerprint-proof. AluTec® surfaces have been specifically treated to make them highly resistant to scratches, marks and corrosion. Exceptional durability ensures that they retain their good look in the busiest kitchen environment.

## 5 YEAR

G U A R A N T E E

We offer a 5 year guarantee, including parts and labour, on a range AEG-Electrolux appliances. Look out for the logo on selected products. The 5 year guarantee is subject to registration and conditions of guarantee.

## CARING

FOR THE ENVIRONMENT

The Electrolux Group has always been committed to minimising the amount of electricity, water and detergent used by household appliances, not only helping to care for the environment but saving money for users as well. As a result, many of our appliances achieve 'A' energy and performance ratings. Our environmental policy minimises the ecological impact of every appliance at each stage of its life, from manufacture to disposal. Use of the latest technology allows us to produce appliances using fewer types and smaller quantities of raw materials. Waste is kept to a minimum and recycled wherever possible.

## AWARD-WINNING

D E S I G N

AEG-Electrolux products have high performance design built-in, receiving several design awards. Look out for the following accreditations throughout the brochure.

reddot design award  
winner 2006

# FORM

AWARD WINNING DESIGN

AEG - Electrolux ovens have high performance design built in, receiving several design awards including the prestigious IF Design Award 2004. The appearance of our ovens coordinates perfectly with all other kitchen appliances to enhance the appearance of every kitchen.

With a range of single and double ovens in a variety of colours AEG-Electrolux offers an array of truly unique technology from a Multifunction Oven with Fully Integrated Steam Functions to a Double Oven with electronic interactive display and digital cooking.

**function**  
rewarding results

The AEG-Electrolux oven range deliver the ultimate in style, practicality and performance, combining advanced technology with stylish, award-winning design.

## AVANTGARDE

### TECHNOLOGY

#### AUTOMATIC SOLUTIONS FOR PERFECT RESULTS

Avantgarde is the latest in intelligent digital technology, designed to take the guesswork out of cooking. With a host of advanced features, Avantgarde ovens will automatically make recommendations to help achieve perfect cooking results.

**Automatic Meat Probe:** simply place the probe into the meat and use the manual to select the correct internal temperature. When the tip of the probe reaches this temperature, the oven switches off. It takes the guesswork out of cooking and ensures meat is never under or overcooked.

**Automatic weight programmes:** Simply select the weight and food type, and the oven will suggest the perfect temperature and cooking time. It will also automatically suggest the perfect programme type for the food you are cooking.

## PYROLUXE

### CLEANING

#### AN OVEN THAT CLEANS ITSELF

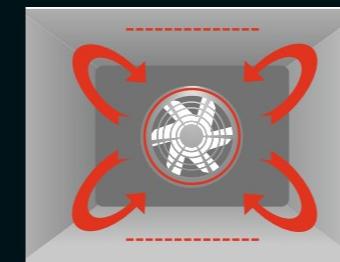

The Pyroluxe® cleaning feature means an oven that never needs cleaning – ever. Once the Pyroluxe® setting has been selected, the oven heats to 500°C and burns off even the most stubborn cooking residues, leaving only a light ash which can simply be wiped away with a damp cloth. All Pyroluxe® ovens come with Light and Intensive Cleaning options. It thoroughly cleans even those difficult to reach places effortlessly, whilst costing less than most household cleaners.

All AEG-Electrolux appliances are designed with safety in mind, so the door locks during cleaning until it has cooled to an acceptable level. And the quadruple glazed doors ensure that the door is safe to touch even at 500°C, so peace of mind is guaranteed.

## VENTITHERM®

### PRECISION

#### THE ULTIMATE IN FAN COOKING

Ventitherm® Precision is the ultimate in fan cooking. The fan gently circulates hot air around the oven to give an even temperature throughout. The ring element and top and bottom elements are also electronically controlled for precise heat management. This precise heat distribution and temperature control gives perfect cooking results and is ideal for cooking dishes like soufflés.

Ventitherm® Precision also allows a greater range of cooking temperatures from 30°C to 300°C, ideal for bread proving to browning crème brûlées.

## STEAM

### OVEN

#### THE WORLD'S ONLY MULTIFUNCTION OVEN WITH STEAM

Steam cooking offers fantastic cooking results with excellent health benefits, and the AEG-Electrolux B98204 is the only full size oven on the market that offers multifunction cooking with fully integrated steam functions. Food can be cooked to perfection with all the texture, colour and flavour preserved. Food is crisp on the outside and moist and succulent on the inside, so it looks and tastes better. The steam also isolates the food cooking, so that flavours do not mingle, meaning you can cook sweet and savoury at the same time. Cooking with steam is also a healthier option – it does not require additional fat to be added and retains a far higher level of nutrients, vitamins and minerals.

The AEG-Electrolux steam oven even 'steam cleans' itself when the cooking is done.

## Oven functions

 **OVEN FUNCTIONS** This symbol represents the number of oven functions.

 **VIGOROUS STEAM** The steam generator works with a fixed temperature at 96°C, to deliver a constant flow of steam. Ideal for vegetables, rice and fish, it ensures that all the vitamins and nutrients are retained.

 **INTERVAL STEAM** This unique feature alternates steam and fan cooking with 25% steam and 75% hot air. Food is crisp on the outside and moist and succulent on the inside, so it looks and tastes better. Ideal for roasting, baking and complete meal cooking.

**INTERVAL PLUS** Alternates between steam and air using 50% steam and 50% hot air. Food doesn't dry out, and the quality is maintained, making it ideal for foods with a high moisture content or for reheating foods.

 **VENTITHERM®** The fan gently circulates hot air throughout the oven to give an even temperature. Ventitherm® ensures no transfer of flavours so you can cook sweet and savoury dishes together. It is also a very economical and time-efficient cooking system, as it does not require preheating for most dishes.

 **VENTITHERM® PRECISION** Ventitherm® Precision is the ultimate in fan cooking. The fan gently circulates hot air around the oven to give an even temperature throughout. The ring element and top and bottom elements are also electronically controlled for precise heat management. This precise heat distribution and temperature control gives perfect cooking results and is ideal for cooking dishes like soufflés.

Ventitherm® Precision also allows a greater range of cooking temperatures from 30°C to 300°C, ideal for everything from proving bread to browning crème brûlées.

 **FAN CONTROLLED DEFROSTING**

A hygienic and gentle way to defrost food. Suitable for even delicate items such as cream cakes, this defrost circulates room temperature air around the food slowly, defrosting it in less than 1/2 the usual time.

 **DUAL CIRCUIT VARIABLE GRILL** Uses the inner and outer part of the grill element, to provide full width even grilling, ideal for large portions.

 **VARIABLE ECONOMY GRILL** Uses only the inner part of the grill element, ideal for smaller portions such as 4 slices of toast. The heat is controllable and using one element saves energy.

 **FAST GRILL** Heats up in less than 5 seconds. It is 20 times faster than a conventional grill, reduces grilling time by up to 50% with a 60% improvement in energy efficiency, compared to a standard grill element.

 **ROTITHERM ROASTING** Heat is directed from the top element to the surface of the food while the fan circulates heat around the oven. This clever setting gives the perfect authentic spit roast effect for meat, poultry and roasting potatoes; all the benefits of a rotisserie without the mess.

 **CONVENTIONAL COOKING** Heat from the top and bottom elements provide traditional cooking with zoned heat. Ideal for baking bread and cakes, as the oven becomes hotter at the top.

 **PIZZA SETTING** The base element crisps the pizza base, leaving the topping perfectly cooked. This feature is also ideal for quiches and flans.

 **SPEEDCOOK** Prevents the need to preheat the oven - it is brought to full temperature almost immediately. This time-saving feature is ideal for cooking convenience foods.

 **HOT AIR FAN BAKING** The base element and the fan work together to provide the perfect environment for baking.

 **TEMPERATURE PROBE** Simply place the probe into the meat and use the manual to select the correct internal temperature. When the tip of the probe reaches this temperature, the oven switches off. It takes the guesswork out of cooking and ensures meat is never under or overcooked.

 **KEEP WARM** Heat from the top and bottom elements are used to maintain a temperature of 80°C, ideal for keeping food warm until ready to serve without drying the food out.

 **BASE HEAT FINISHING** Heat from the bottom element only. Perfect for reheating pies and pastries as it keeps the pastry crisp. It can also be used to slow cook.

 **TOP HEAT BROWNING** A gentle heat from the top element only, ideal for browning lasagne or shepherd's pie.

 **SLOW COOK** Uses low temperature to gently cook. Ideal for casseroles & joints.

 **MULTIFUNCTION** AEG-Electrolux Multifunction ovens combine fan cooking with conventional cooking, giving up to 10 cooking tailored functions for exceptional cooking versatility.

## Oven features

**DIGITAL TOUCH CONTROLS** Easy to use, highly responsive touch controls which give precise control of all the oven's functions.

**AVANTGARDE TECHNOLOGY**

Avantgarde is the latest in intelligent digital technology, designed to take the guesswork out of cooking. With a host of advanced features, Avantgarde ovens will automatically make recommendations to help achieve perfect cooking results.

**LCD FULLY ELECTRONIC DISPLAY**

Interactive Digital Cooking. The LCD display provides constant information ensuring complete control of the cooking process. It recommends the ideal cooking temperature and when the temperature has been reached, shows how long the oven has been on for and displays the current function selected.

**LED DIGITAL DISPLAY**

Menu Guided Temperature Control. The LED display makes programme selection easy by recommending the ideal cooking temperature and advising when the temperature has been reached.

**24 HOUR ELECTRONIC CLOCK, MINUTE MINDER AND FULLY PROGRAMMABLE TIMER**

The oven can be programmed to switch on and begin cooking and then switch off after a set duration, also sounding an alarm when the cooking is completed. Enables forward planning, and gives full control over cooking.

**COUNT UP TIMER** Lets you know how long the oven has been on, cutting out the guesswork.

**RESIDUAL HEAT INDICATION**

Indicates the level of heat in the oven after it has been switched off. Can also be used as an energy-saving method to keep food warm with residual cooking heat.

**CONTROLS**

**Digital touch controls:** Very precise, easy to use and straightforward to clean

**Digital push button:** Accurate and easy to use

**Digital rotary:** Easy to use, with LED illumination

**Retractable rotary:** Provides a flush finish for easy cleaning

**Standard rotary controls:** Easy to use

**OVEN ILLUMINATION** A selection of either Halogen, 40W or 25W lighting is available in all ovens, for easy viewing of what is cooking.

**Alutec®:** This latest finish from AEG-Electrolux takes the style and elegance of stainless steel one stage further. AluTec® is a distinctive pearl blasted aluminium finish, which perfectly complements all types of kitchen furniture.

**Convenient cleaning:** AluTec® is exceptionally easy to keep clean. Even abrasive cleaning detergents can safely be used without leaving marks on the surface and it is fingerprint-proof.

**Scratch resistant:** AluTec® surfaces are specifically treated to make them highly resistant to scratches, marks and corrosion. Exceptional durability ensures that they retain their good look in the busiest kitchen environment.

**ENERGY RATING** All Electric Ovens must now declare their energy rating. All AEG-Electrolux ovens are either A or B rated, for excellent economy.

**COOKING ACCESSORIES**

**MEAT PAN** Full width for the largest cuts of meat.

**GRILL PAN AND HANDLE** All ovens are supplied with a grill pan & handle\*.

**PIZZA STONE** For authentic stone baked pizzas.

**BAKING SHELF** Full width for maximum cooking space.

**TELESCOPIC SHELF RUNNERS** Additional accessory which enables baking shelves and wire shelves to be pulled out fully. They glide out effortlessly with a smooth rolling action.

**SAFETY FEATURES**

**ISOFRONT® & ISOFRONT® PLUS** The oven doors are either double, triple or quadruple glazed - these multilayered glass panes with a heat reflective coating keeping the heat in the oven and the door cooler.

**AUTO SAFETY SWITCH OFF** For peace of mind, the oven automatically switches off when it is left on for too long (time and temperature dependant).

**CHILD LOCK** Oven controls can be locked to prevent misuse.

\*Excludes B81394 & B98204

## Cleaning features

**Pyrolyse® cleaning**

Cleans the oven by heating up to 500°C and burning off the most stubborn cooking residues, leaving only ash to simply wipe away with a damp cloth when the oven has cooled. The door locks for safety at 300°C and with the quadruple glazed door reducing surface temperatures, the oven door is safe to touch even at 500°C. Pyrolyse® has light, normal and heavy options and keeps your oven hygienically clean without using chemicals and costs less than most household oven cleaners.

**HEAT ACTIVATED CATALYTIC CLEANING** The catalytic cleaning method absorbs the grease from cooking and with regular heating to 220°C the grease residue is brought to the surface to be easily cleaned away.

**DIAMOND GLAZED ENAMEL INTERIOR** Ultra smooth enamel interior making cleaning easier.

**FULL GLASS INNER DOOR WITH REMOVABLE PANES** All AEG-Electrolux single and double in-column ovens have removable glass panes making cleaning easy. All ovens feature full glass inner doors with no dirt traps.

**FOLD DOWN GRILL** Folds down to enable oven roof to be cleaned easily.
